

COVID VACCINES

for children

- Vaccines are available for children 5-11
- Vaccines are free for children
- You can find a vaccine location near you by going to www.vaccines.gov

WHY SHOULD YOU VACCINATE YOUR 5-11 YEAR OLD?

- 1 We do not know the effects long COVID may have on a child's development.
- 2 Children can get very sick and die from COVID
- 3 Vaccinated kids who are exposed to COVID won't have to do a traditional quarantine. This means less time out of school.
- 4 Getting kids vaccinated helps protect everyone such as their grandparents and teachers.
